

Vehicle Armor

Composiflex, in cooperation with Saint-Gobain, a leader in ballistic ceramics, and Honeywell, producers of the Spectra fiber and Spectrashield uni-directional material produced an armor package for the High-Mobility Multipurpose Wheeled Vehicle - HMMWV - the vehicle that has come to be known as the Humvee or Hummer.

At right is a door panel that clearly shows the matrix.

This is the same door panel from a different angle. With extensive capabilities and modern equipment and techniques, Composiflex is able to produce complex armor systems exactly to print.
