

Carbon Fiber Radiographic Imaging Products

CARBON FIBER COMPOSITE IMAGING TOPS

Of your damaged or distressed table tops with a new highly radiolucent Carbon Fiber Top that is able to withstand the severity of everyday clinical use.

Carbon Fiber can provide many advantages over conventional table materials

- ❖ Lightweight yet Sturdy
- ❖ Patient loads up to 400 Lbs.
- ❖ Low X-ray/Gamma Attenuation between .3-.6
- ❖ Lower scatter/Distortion
- ❖ Lower Patient/Technician Exposure Level

We know how incredibly expensive it is for a Hospital or Clinic to have an imaging system down because of a damaged table top. We stock carbon fiber replacement tops for some of the most popular Siemens, G.E. and Pausch Tables. Our state of the art production facilities enable Composiflex to offer rapid turnaround of most table tops. Composiflex provides a high quality, cut effective solution to your imaging problems
